

# FLAT AND PEAKED SHADERS

## SOCIAL DISTANCING PRODUCTS

With social distancing outside of retail stores now the new normal, you can make your customers more comfortable while waiting outside with VRE's portable and seasonal flat and peaked shader structures.

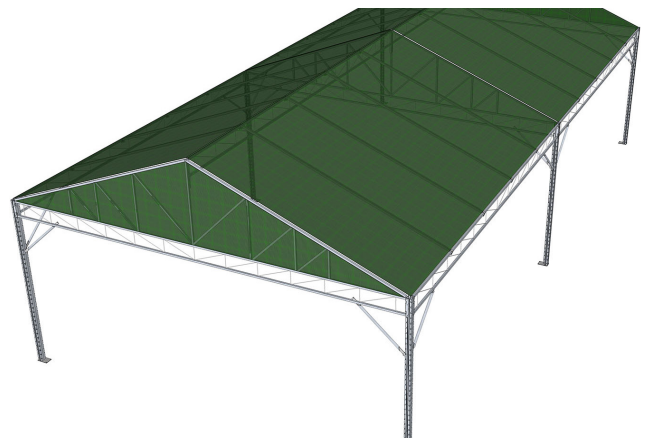

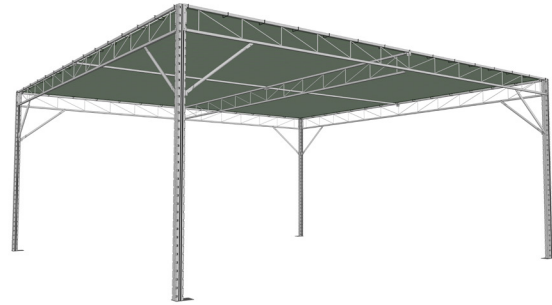

Designed primarily for garden centres and plant nurseries, shaders can offer customers shade from summer's sun, and some relief from precipitation.

Easy to install and dismantle, VRE's shaders come in standard sizes of 16' by 16' and 20' by 20', with a standard height of 9'.

Custom sizes are also available.

Fabric is 1000 denier woven polyester scrim, which is UV light resistant, as well as being mildew and rot resistant.

For information please call VRE Systems and ask to speak to a sales representative.
