---

VRE and its Management Team takes great pride in being a key business partner and have been working hard to continue to deliver great service and quality products to our customers as the spread of COVID-19 (the coronavirus) continues. At this time, our business has not been disrupted, our supply chain is strong and fully intact and we have determined that we meet the criteria as being an “essential service” in Ontario.

At the same time, nothing is more important than the safety and wellness of our Team Members, their families and our communities. That being said, the Management Team has been aggressive in implementing additional procedures within our facility while following all recommendations from global and local health organizations. To that point, here is a list of some of the changes that have been implemented:

- Added additional cleaning processes throughout our facility during the day
- Closed and/or restricted common areas
- Ensuring social distancing by staggering break and lunch timing and changing work processes
- Limiting access to our facility
- Eliminating walk in customer traffic (Order forms for these customers on our website) at [www.vresystems.com/order](http://www.vresystems.com/order)

This list is by no means exhaustive and the Management Team at VRE has and will make any necessary changes in order to eliminate COVID-19.

VRE is committed to taking every possible action to ensure the safety of our Team Members and customers during this difficult time. We are constantly monitoring and searching for the latest news and recommendations from the Centers for Disease Control (CDC), the World Health Organization (WHO), and our Canadian medical professional organizations.

Our hope at VRE is that all people worldwide will also implement and follow procedures to fight the pandemic and that everyone stays healthy, and that business resumes as normal.

If you have any questions regarding VRE’s response to this current health crisis, please contact myself at ext. 224 or John Staios at ext. 233.

Mark Wood  
Human Resources and Safety Leader
